Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 12-21 and 31-35 drawn to a method for inducing insulin production in cultured endocrine pancreas β -cells, classified in class 435, subclass 70.3.
- II. Claims 11 and 22, drawn to a method for identifying modulators of β -cell function, classified in class 435, subclass 384.
- III. Claims 23-30, drawn to a method for treating diabetes, classified in class 424, subclass 9.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I, II and III are biologically and functionally distinct from each other and thus one does not render the other obvious. The methods of Groups I, II and III comprise steps which are not necessarily required for or present in the methods of the other groups: a step of identifying modulators of β -cells (Group II) and a step of administration of cells to a subject (Group III). The end result of each method is directed to a different outcome: the induction of insulin gene expression (Group I), the identification of modulators of β -cell function (Group II) and the treatment of a diabetic individual (Group III). Thus, the operation, function and effects of these different methods are different and distinct from each other. Therefore, the inventions of these different, distinct groups are capable of supporting separate patents.

Art Unit: 1636

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because the non-patent literature search for the different groups is different, restriction for examination purposes as indicated is proper. A search of one group would not be co-extensive with a search of another hence said search would be burdensome.

A telephone call was made to Matthew E. Hinsch on June 24, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A Lambertson whose telephone number is (703) 308-8365. The examiner can normally be reached on 8am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Remy Yucel, Ph.D. can be reached on (703) 305-1998. The fax phone numbers for
